Weiler Watch™ ASSET MANAGEMENT SYSTEM

WEILER WATCH™

FLEET MANAGEMENT.

Manage your Weiler fleet from your computer, tablet or phone with real-time location, hours, status and fluid levels. Weiler Watch™ integrates with your VisionLink software to quickly monitor your fleet.

UTILIZATION REPORTING.

Analyze your fleet utilization with runtime performance including working hours, idle hours and fuel burn rates. Establish target runtimes, compare daily work times and fuel consumption.

WEAR LIFE CALCULATOR.

Weiler Watch™ provides machine specific wear life calculations based on periodic wear component measurements. Machine specific calculations allow for maximum life of wear components and ability to schedule maintenance for minimal down time.
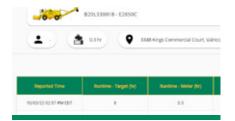

MACHINE HEALTH.

View machine fault codes with fault status, source, description and type. Review machine diagnostics at last reported time or use Rapid Report to access real-time diagnostics for the engine, drivetrain, feeder system, sensors and CAN system.

MAINTENANCE HISTORY.

Weiler Watch™ notifies users of next scheduled maintenance requirements. System allows user to log service activities to create a service history for each asset.
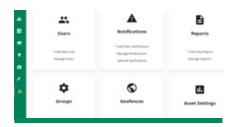

CUSTOMIZE TO YOUR NEEDS.

Create custom reports to best manage your fleet. Manage asset settings, users, groups, geofences and notifications and add notes to best fit the needs of your organization.
